## Division of Energy

### Comprehensive State Energy Plan Working Group #2 – Energy Distribution and Storage November 19, 2014, 11:30 AM – 1:00 PM

**Conference Call Information: Webinar information will be provided Tuesday November 18  
Working Group Lead: William Haas**

#### Agenda

- 11:30 AM Welcome and Introductions  
Overview of the Plan Development Process  
Lewis Mills, Director, Division of Energy
- 11:35 AM Introduction to the Working Group Topic  
William Haas, Working Group Lead
- 11:40 AM Approach to Working Groups and Working Group Logistics  
William Haas, Working Group Lead
- 11:50 PM Public Meetings Recap  
William Haas, Working Group Lead
- 12:00 PM Open Discussion:
- What aspects of energy distribution infrastructure should the plan consider? Are there specific or model policies that the Working Group should review?
  - To what extent should the Plan recommend a statewide approach to including smart grid technologies within Missouri's electricity distribution systems?
  - Should a comprehensive, statewide policy approach for distributed energy systems be considered?
  - What aspects of energy storage are most appropriate for Plan consideration given that many technologies are not ready for large-scale commercial deployment?
  - What actions should the Plan recommend with regard to fuel storage (natural gas, propane, and petroleum)? Is this an area that Working Group members would like to see included in the Plan?
  - Should comprehensive statewide policies be considered for the siting of electric transmission lines and pipelines for petroleum and natural gas?
  - Should the plan address barriers (such as resource, market, technology, policy, workforce development) associated with the development and deployment of energy storage?
  - Other?
- 12:50 PM Commitment for Subsequent Meeting Involvement and Next Steps
- 1:00 PM Adjourn
