

Division of Energy

Comprehensive State Energy Plan Working Group #6 – Energy Security, Assurance, and Resources in Emergencies November 21, 2014, 2:00 PM – 3:30 PM Conference Call Information: Webinar information will be provided Tuesday November 18 Working Group Lead: Antonia Ornelas

Agenda

- 2:00 PM Welcome and Introductions
Overview of the Plan Development Process
Lewis Mills, Director, Division of Energy
- 2:05 PM Introduction to the Working Group Topic
Antonia Ornelas, Working Group Lead
- 2:10 PM Approach to Working Groups and Working Group Logistics
Antonia Ornelas, Working Group Lead
- 2:20 PM Public Meetings Recap
Antonia Ornelas, Working Group Lead
- 2:30 PM Open Discussion:
- What aspects of energy emergency response should the Plan consider to assure that critical infrastructure facilities have the energy resources needed to operate in times of disasters?
 - We heard from the public comments provided that collaboration between utilities, communities, and state agencies is important during an energy emergency. What collaborative actions should the Plan recommend to prepare and recover from a disaster from a community perspective? Should energy efficiency improvements be considered during this time?
 - To what level should the Plan recommend including microgrid systems as an approach to energy security and assurance?
 - What state-level strategies and exercises should the Plan consider to strengthen cyber defense and what is the role of the state on cybersecurity in relation to the utilities, federal, and local governments?
 - What efforts should be undertaken by the state and key stakeholders to ensure a secure and reliable energy infrastructure and how can it better manage interdependencies?
 - What considerations should the Plan give to energy suppliers in case of an energy pricing and market emergency? For example, how big of a supply of coal does the state have if there was a disruption of coal supply?
- 3:20 PM Commitment for Subsequent Meeting Involvement and Next Steps
- 3:30 PM Adjourn
