**MISSOURI ENERGY BULLETIN**

June 25, 2019

*(Data are for the week ending June 14, 2019, unless stated otherwise.)*

**Crude Oil**

U.S. crude oil prices decreased by \$7.66 to \$53.76 per barrel in the past month and are 19 percent lower compared to this time last year.

Crude Oil - Near Month Future Prices (dollars per barrel)					
	06-19-19	05-22-19	change	06-20-18	change
NYMEX	\$53.76	\$61.42	down 12%	\$66.22	down 19%

- On June 19, crude oil futures for delivery on the NYMEX ended lower on the week to settle at \$53.76 per barrel. The price for crude oil futures is \$7.66, or 12 percent, below the month-ago level.
- Compared to this time last year, the U.S. crude oil futures settlement price of \$53.76 is \$12.46, or 19 percent, lower.
- Despite China increasing its crude oil imports, Saudi Arabia’s crude oil exports are lower partly because U.S. crude oil imports from Saudi Arabia reached a 31-year low.
- Domestic crude production was lower relative to the prior week at 12.2 million barrels per day (MMB/D). Last year at this time, production stood at approximately 10.9 MMB/D.
- Total crude imports were down over the prior week at approximately 7.5 MMB/D. Imports at this time last year were approximately 8.2 MMB/D.
- U.S. crude oil supplies decreased 3.1 MMB on the week to 482.4 MMB. U.S. supplies are 55.9 MMB higher compared to this time last year.

- U.S. refinery crude runs were higher relative to the prior week with refiners processing approximately 17.3 MMB/D. U.S. refinery capacity utilization was higher on the week at 93.9 percent. Last year at this time, capacity use stood at approximately 95 percent.
- Gasoline output was higher on the week at approximately 10.4 MMB/D. Output was approximately 10.1 MMB/D at this time last year. Distillate output was higher than the prior week at approximately 5.4 MMB/D. Last year at this time, production stood at 5.5 MMB/D.
- Total petroleum products supplied to market, a measure of consumption, over the last four-week period stood at 20.7 MMB/D, up by about 1.8 percent compared to the same period last year.

### ***Transportation Fuels***

***(Note: Gasoline and diesel prices may be obtained from the American Automobile Association (AAA) and the U.S. Energy Information Administration (EIA), as described below. Effective 06/25/2019, the Division of Energy no longer conducts phone surveys to obtain the prices for these fuels.)***

For access to additional information on regional and national gasoline prices, stocks, production, and demand, please visit: <https://www.eia.gov/petroleum/weekly/gasoline.php> To navigate to the above URL from EIA's home page, select the "Sources & Uses" tab at the top of the page, click on "This Week in Petroleum", and then click on the GASOLINE tab.

For access to and additional information on Missouri gasoline and diesel price averages by city and county, please visit: <https://gasprices.aaa.com/?state=MO>.

- At approximately \$2.67, the U.S. average price for regular gasoline is 18.3 cents per gallon, or 6 percent, lower compared to last month.
- The U.S. average price for regular gasoline is 21 cents per gallon, or 7 percent, lower compared to this time last year. In the past week, the U.S. average decreased by 6.2 cents per gallon.
- Gasoline imports increased slightly from the prior week at approximately 0.8 MMB/D. Last year at this time, imports stood at approximately 0.9 MMB/D.
- Implied demand for gasoline was higher on the week at approximately 9.9 MMB/D. Demand stood at approximately 9.3 MMB/D at this time last year.
- In the past four weeks, U.S. gasoline demand has averaged approximately 9.7 MMB/D.

- U.S. gasoline supplies were down 1.7 MMB on the week at 233.2 MMB. U.S. supplies are 6.8 MMB lower than this time last year.
- Distillate stocks decreased 0.6 MMB on the week at 127.8 MMB and stand 10.4 MMB higher compared to the same period last year.
- Distillate demand was lower on the week at approximately 4.1 MMB/D. Demand stood at approximately 3.8 MMB/D at this time last year. On a four-week average, distillate demand was higher at approximately 4.0 MMB/D.
- On June 17, Missouri's average retail price for E85 motor fuel, conventional motor fuel containing 85 percent ethanol, was approximately \$2.16 per gallon.
- On June 17, Missouri's average retail price for B20, diesel fuel containing 20 percent biofuel, was almost \$2.86 per gallon.
- According to the U.S. Energy Information Administration's (EIA) latest *Short Term Energy Outlook* dated June 11, 2019, U.S. regular gasoline retail prices, which averaged \$2.42 per gallon in 2017, \$2.73 in 2018, and averaged \$2.64 to date in 2019, are projected to average \$2.75 in 2020.

## Natural Gas

Approximately 51.0 percent (1,217,836) of Missouri households use natural gas to heat their homes. (Data updated from the most recent U.S. Census report.) Natural gas is also used to produce goods and electricity.

**On June 19, 2019, natural gas futures on the NYMEX closed at \$2.28 per million British thermal units (MMBtu), down approximately \$0.26, or 10 percent, in the past month.**

Natural Gas - Near Month Future Prices (dollars per MMBtu)					
	06-19-19	05-22-19	change	06-20-18	change
NYMEX	\$2.28	\$2.54	down 10%	\$2.96	down 23%

- The July 2019 NYMEX futures contract settled at \$2.28 per MMBtu on June 19, down \$0.11 from the June 12 settlement.
- In the past month, the futures contract has decreased 26 cents, or 10 percent.
- Futures are down \$0.68, or 23 percent, in the past year.
- According to EIA's *Weekly Natural Gas Storage Report*, U.S. natural gas supplies are at 2,203 billion cubic feet (Bcf), 11 percent higher than last year at this time.
- According to the EIA, net injections to working gas totaled 115 Bcf for the week ending June 14.
- Temperatures in the Lower 48 states averaged cooler than normal for the U.S. except for the persistent warm spell in the southwest. Heating degree days nationally were 2 below the normal, while cooling degree days were 1 below the normal.
- According to EIA, total U.S. consumption of natural gas fell 1 percent compared with the prior report week. In the residential and commercial sectors, consumption increased by 3 percent. Natural gas consumed for power generation decreased by 1 percent week over week. Industrial sector consumption decreased 2 percent week over week. Natural gas exports to Mexico increased 2 percent over the week.

## Propane

Approximately 8.9 percent (213,192) of Missouri households use propane to heat their homes. (Data updated from the most recent U.S. Census report.) Propane is also used to support commercial operations, produce goods, dry grain harvests and fuel vehicles.

**On June 3, the average Missouri retail price for residential propane was approximately \$1.49 per gallon, down 8.0 cents, or 5 percent, in the past month.**

Propane - Retail Prices (cents per gallon)					
	06-03-19	05-06-19	change	06-18-18	change
Missouri	148.6	156.6	down 5%	161.9	down 8%

- According to the Division of Energy's most recent statewide propane price survey conducted June 3, the average Missouri retail residential propane price was approximately \$1.49 per gallon.
- According to the survey, the highest Missouri retail residential price for propane was \$1.70 per gallon. The lowest retail price was \$1.16 per gallon.
- On June 14, U.S. propane/propylene stocks had increased over the prior report week at 74.5 MMB. As of June 14, 2019, U.S. propane/propylene stocks were 20.4 MMB, or 38 percent, higher than the year ago inventory level for this same time of year. Midwest inventories increased by approximately 1.1 MMB to 19.1 MMB for the report week. Midwest inventories stood at approximately 17.7 MMB at the same time last year.
- U.S. propane consumption was lower week over week at 0.6 MMB/D. Consumption stood at approximately 0.5 MMB/D at the same time last year.

The *Missouri Energy Bulletin* is distributed twice a month by the Missouri Department of Economic Development's Division of Energy. The Division of Energy collects E-85, B-20, and propane heating fuel prices from a sample of retail providers located throughout the state. The average price reported is based on these sample prices and may or may not reflect the actual price of a particular retail provider. To preserve confidentiality, price data are averaged and reported by region. The bulletin is a public resource made available to state government decision-makers and other interested individuals upon request and online at the Division's web address. The Department thanks each of the following in helping to provide accurate, timely data on fuel supplies and prices: the U.S. Department of Energy's Energy Information Administration; the National Association of State Energy Officials; the St. Louis AAA Auto Club; and Missouri's energy retailers. For more information, contact: MO Dept. of Economic Development, Division of Energy, P.O. Box 1766, Jefferson City, MO 65102-1766; Phone: 573-751-2254; Fax: 573-751-6860; Email: [energy@ded.mo.gov](mailto:energy@ded.mo.gov); Web Address: <http://energy.mo.gov/energy/stay-informed/missouri-energy-bulletins>.
